

## CYBERSECURITY NEWS AND THREAT INTELLIGENCE SHARING

**Cybersecurity News** are news coverage related to cybersecurity incidents, vulnerabilities, and breaches.

**Content:** Threat news includes reports on recent cybersecurity events, data breaches, and emerging threats. It may lack the in-depth analysis and strategic context found in threat intelligence.

**Threat Intelligence** refers to information that has been systematically collected, analyzed, and processed to provide actionable insights into potential cyber threats.

**Content:** Threat intelligence includes details about threat actors, their motives, tactics, techniques, procedures (TTPs), indicators of compromise (IoCs), and other strategic information. It is often contextualized, relevant, and tailored for organizations to enhance their cybersecurity defenses.
